Applicant's amendments and remarks filed 11/21/02 and 1/7/03 have been received and reviewed. Claims 1-14 are now pending in this application.

Election/Restrictions

Applicant's election without traverse of the compound number 302 on page 72 in Paper No. 7 is acknowledged.

The claims are not drawn to the same scope. Compounds, corresponding compositions, a method of use and a process of making that are of the **same** scope are considered to form a single inventive concept under PCT Rule 13.1, 37 CFR 1.475(d). The species of the instant claims are not so linked as to form a single inventive concept. The scope of the compounds embraced by claim 1 is not the same as in claim 5. Thus, the claims are not according to the rules. Applicants need to limit the scope of the compounds in the method of use claims to that of the compound claim. In the absence thereof, a lack of unity of invention exists.

Claim Rejections - 35 USC § 112

Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

i) The phrase "hydroxyformamidine derivative" indicates more that the compound is being claimed. Replacing it with the term "compound" is suggested as this term, along with the structural formula and definitions of the variables fully defines the claimed compound. The metes and bounds of a derivative is unknown.

ii) It is unclear where or why the production of 20-hydroxyeicosatetraenoic acid is inhibited. Is

this in vitro or in vivo? Is it done on everybody? A clarification is required.

iii) In claim 4, 12 and 14 it is unclear which kidney disease, which cerebrovascular disease or

which circulatory disease is being treated. These diseases embrace diseases that are not related,

which have different causes and are treated differently. A clarification is required.
